Setup

```
In [ ]: %matplotlib inline
   import matplotlib.pyplot as plt
   import numpy as np
   import pandas as pd

fb = pd.read_csv(
        '/content/fb_stock_prices_2018.csv', index_col='date', parse_dates=True
)
```

Scatter matrix

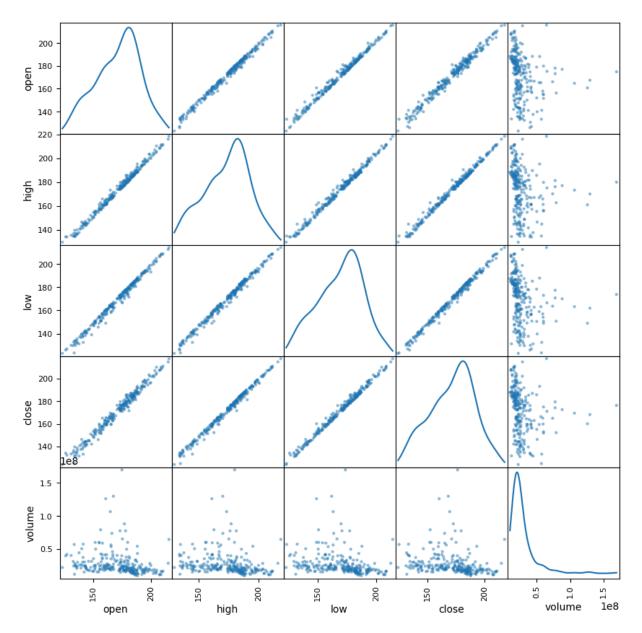

```
In [ ]: from pandas.plotting import scatter_matrix
        scatter_matrix(fb, figsize=(10, 10))
Out[]: array([[<Axes: xlabel='open', ylabel='open'>,
                 <Axes: xlabel='high', ylabel='open'>,
                 <Axes: xlabel='low', ylabel='open'>,
                 <Axes: xlabel='close', ylabel='open'>,
                 <Axes: xlabel='volume', ylabel='open'>],
                [<Axes: xlabel='open', ylabel='high'>,
                 <Axes: xlabel='high', ylabel='high'>,
                 <Axes: xlabel='low', ylabel='high'>,
                 <Axes: xlabel='close', ylabel='high'>,
                 <Axes: xlabel='volume', ylabel='high'>],
                [<Axes: xlabel='open', ylabel='low'>,
                 <Axes: xlabel='high', ylabel='low'>,
                 <Axes: xlabel='low', ylabel='low'>,
                 <Axes: xlabel='close', ylabel='low'>,
                 <Axes: xlabel='volume', ylabel='low'>],
                [<Axes: xlabel='open', ylabel='close'>,
                 <Axes: xlabel='high', ylabel='close'>,
                 <Axes: xlabel='low', ylabel='close'>,
                 <Axes: xlabel='close', ylabel='close'>,
                 <Axes: xlabel='volume', ylabel='close'>],
                [<Axes: xlabel='open', ylabel='volume'>,
                 <Axes: xlabel='high', ylabel='volume'>,
                 <Axes: xlabel='low', ylabel='volume'>,
                 <Axes: xlabel='close', ylabel='volume'>,
                 <Axes: xlabel='volume', ylabel='volume'>]], dtype=object)
```

Changing the diagonal from histograms to KDE:

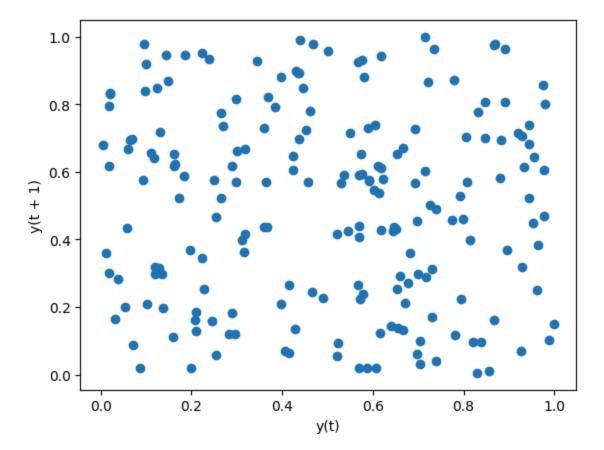

```
In [ ]: scatter_matrix(fb, figsize=(10, 10), diagonal='kde')
```

```
Out[]: array([[<Axes: xlabel='open', ylabel='open'>,
                 <Axes: xlabel='high', ylabel='open'>,
                 <Axes: xlabel='low', ylabel='open'>,
                 <Axes: xlabel='close', ylabel='open'>,
                 <Axes: xlabel='volume', ylabel='open'>],
                [<Axes: xlabel='open', ylabel='high'>,
                 <Axes: xlabel='high', ylabel='high'>,
                 <Axes: xlabel='low', ylabel='high'>,
                 <Axes: xlabel='close', ylabel='high'>,
                 <Axes: xlabel='volume', ylabel='high'>],
                [<Axes: xlabel='open', ylabel='low'>,
                 <Axes: xlabel='high', ylabel='low'>,
                 <Axes: xlabel='low', ylabel='low'>,
                 <Axes: xlabel='close', ylabel='low'>,
                 <Axes: xlabel='volume', ylabel='low'>],
                [<Axes: xlabel='open', ylabel='close'>,
                 <Axes: xlabel='high', ylabel='close'>,
                 <Axes: xlabel='low', ylabel='close'>,
                 <Axes: xlabel='close', ylabel='close'>,
                 <Axes: xlabel='volume', ylabel='close'>],
                [<Axes: xlabel='open', ylabel='volume'>,
                 <Axes: xlabel='high', ylabel='volume'>,
                 <Axes: xlabel='low', ylabel='volume'>,
                 <Axes: xlabel='close', ylabel='volume'>,
                 <Axes: xlabel='volume', ylabel='volume'>]], dtype=object)
```

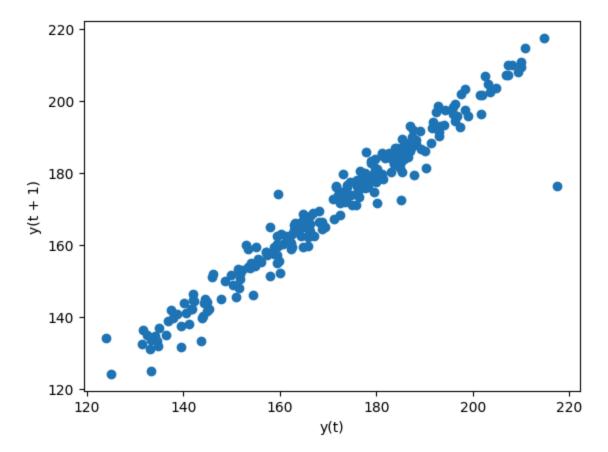

Lag plot

Lag plots let us see how the variable correlations with past observations of itself. Random data has no pattern:

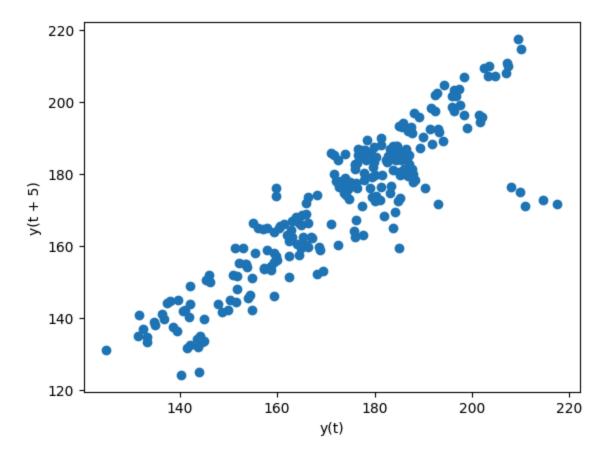

Data with some level of correlation to itself (autocorrelation) may have patterns. Stock prices are highly auto-correlated:

```
In [ ]: lag_plot(fb.close)
Out[ ]: <Axes: xlabel='y(t)', ylabel='y(t + 1)'>
```

The default lag is 1, but we can alter this with the lag parameter. Let's look at a 5 day lag (a week of trading activity):

```
In [ ]: lag_plot(fb.close, lag=5)
Out[ ]: <Axes: xlabel='y(t)', ylabel='y(t + 5)'>
```

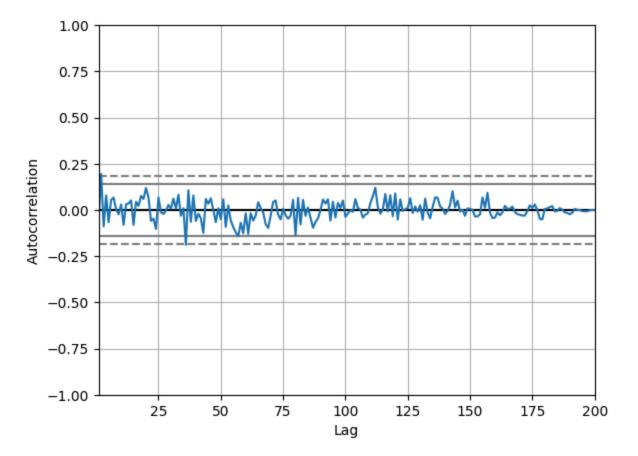

Autocorrelation plots

We can use the autocorrelation plot to see if this relationship may be meaningful or just noise. Random data will not have any significant autocorrelation (it stays within the bounds below):

```
In [ ]: from pandas.plotting import autocorrelation_plot
    np.random.seed(0) # make this repeatable
    autocorrelation_plot(pd.Series(np.random.random(size=200)))
```

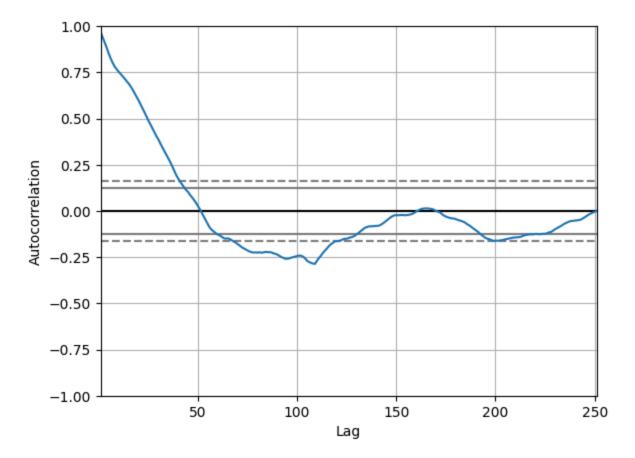

Out[]: <Axes: xlabel='Lag', ylabel='Autocorrelation'>

Stock data, on the other hand, does have significant autocorerelation:

```
In [ ]: autocorrelation_plot(fb.close)
```

Out[]: <Axes: xlabel='Lag', ylabel='Autocorrelation'>

Bootstrap plot

This plot helps us understand the uncertainty
